## About Us

Healthcareturkey.com is focused on helping intentional patients to get better in Turkey which is one of the most popular countries for health tourism in the world. The company is offering packages including accommodation, transportation and treatment. HealthCareTurkey is ready to guide you to finding the best treatment possible with its world widely known hospitals and doctors...

Our co-founder Mr. Yusuf Boz got his BSc degree in International Business department in Australia and he is actively being a member of board reputable internationally known real estate advisory services company located in Istanbul, Turkey.

Our goal is to provide the patient a treatment package with the best possible prices by getting advice from reputable doctors and hospitals which have professional services and high technological facilities and devices. The company is actively working for the patients from America, Africa, Asia, Middle East and Europe, so basically from all over the world.

HealthCareTurkey are being responsible of the client's transportation place from the airport to the adequate accommodation place where is also arranged by the company, then from the place

where they are staying to the hospital, and then the way back to accommodation place and the airport. The company is aiming to get the patient as relaxing as possible, so they don't need to think about the transportation and also the accommodation during treatment stage.

HealthCareTurkey is following to be made first diagnosis in the hospital which have already been contracted before and following the rest of the process for treatment until it ends. The company's dynamic and active team members are working closely related departments of the hospitals to update the patient even before the client comes to Turkey, during his/her treatment in Turkey and when they go back to their countries if they have any assistance. All of the doctors are also specialized in their fields/treatment and the doctors or professional translators working in the hospitals are helping communication, so we are aiming to avoid misunderstanding during the treatment.

Based on the company's experience in the field of Health Tourism in Turkey, it is our pleasure to give the best possible services.

Please don't hesitate to contact if you have any further questions...

## Why Turkey ?

Turkey is one of the best providers of modern medical treatments

Why Turkey is among the most excellent options if it's about medical tourism

The health ministry controls and manages the health services in Turkey. The central government helps a lot in doing the job. More than a decade ago, the Turkish government introduced the health care programs for the common people.

### Medical tourism strengths of Turkey

- Housing many of the themes of available sources for thermal and also ranking the nation in the first place in the continent of Europe, in terms of having the majority numbers of thermal sources.
- Turkey carries a global positive image.
- The nation has suitable climate for all the seasons.
- Having quality human resources particularly the medical staff.
- The health services in Turkey are way more affordable as compared to other countries.
- One of the most vital advantages of the country is that medical or health tourism is controlled by an institution that coordinates the tourism happenings and also having policies for the states.
- The nation ranks second when it comes to num-

ber of accredited hospitals with JCI.

- Turkey is a historical and popular tourist center.
- The country is having a world class airway facility. The easy visa processes make the Turkey worth a visit.
- In the last few years, Turkey has grown into a state with greatly improved medical infrastructure. The nation can highly compete with any other nation from the west.
- To have a three hours distance of flight for the population of 1 billion persons.
- Housing serious potential of the personnel along with the young population.

### More insights

Turkey is one of the leading players in the health and medical tourism sector and is increasingly emerging as one of the most preferred choice for wide array of medical aids. The country's advantage if it is about medical tourism is high and great number of government approved and accredited medical centers in ophthalmic operations, metabolic and bariatric operations, cosmetic as well as reconstructive surgeries, oncologic and transplantations at really affordable prices.

The high quality services are provided with historical, cultural and natural attractions of the country. Medical and health tourism has emerged

as a booming business in this part of the world, along with 700000 persons visiting the country in the previous few years. Many of the travelers, who are traveling to Turkey, are due to the quality, costs, and waiting period and lastly the ultimate facilities.

The Joint Commission International or JCI has accredited around 32 hospitals in Turkey. These hospitals are located in the land of Istanbul. In the year 2008, Turkey hosted around 80000 visitors for medical and health tourism. The figure has seen a steady rise in the last 10 years and the expectations are that Turkey will see more and more tourists in

the coming years. The land provides a better quality of medical treatment at very affordable prices as compared to other European nations.

Turkey was ranked among the top 5 best tourism destinations, by international media. South Korea was the second, while Thailand being the fourth. The nation has got some of the best accreditation credentials. Some of the hospitals are also in partnerships with few of the most appreciated hospitals in the whole world. We at Health Services Turkey are staffed with numerous highly skilled medical professionals, who are no less than the western doctors.

## Treatment processes in Turkey

**1#** The patients' medical reports are shared with the team of Health Services Turkey for diagnose and the complaints.

**2#** The patients' files and complaints are shared with the physicians who are in contractual health institutions.

**3#** The foreseen treatments and medical procedures are transferred to the medical team.

**4#** The patients are informed by the Health Services Turkey about the processes of treatments in Turkey and also about the pricing.

**5#** The health conditions are declared to the pa-

tients from the time they decide to get treated by Health Services Turkey.

**6#** The appointments with physicians are arranged subsequent to the approval of the health visa.

**7#** The transportations to the hotels are provided as per the plan of treatments. If the treatment is an emergency one, then it may also carry death risk, the transportation from the airport to the health center where the patient will be treated and also will be provided with an ambulance. We at Health Services Turkey are always happy to help you.
